

## FOUNDATION FOR HEALTH COVERAGE EDUCATION

Americans face a spectrum of issues including a sluggish economy that threatens their American dream, the need for job creation in every sector, and the need for common sense, responsible healthcare solutions.

Phil Lebherz, Chairman of FHCE, will offer remarks designed to introduce this non-profit, private sector, high tech, low cost solution that addresses the needs of the uninsured and can lower the costs for all by driving costs to their proper allocation and aiding us in making fact-based legislative choices.

He will offer this background:

**Through the power of technology, FHCE enables people who need healthcare to obtain it.** 16.9 million individuals who are lacking healthcare now can have relatively easy access to it by answering five easy questions on line. Point of care access to healthcare is a viable solution for those in need of healthcare. To date, FHCE has helped over 3 million Americans secure existing healthcare coverage. This technology also offers the opportunity to provide efficient, responsive private sector exchanges at the state level.

With a mission to “provide simplified public and private health insurance eligibility information in order to help more people access coverage”, FHCE enables people to make rational healthcare decisions and causes the right entities to pay. **FHCE enables us as a nation to know and control our costs, prevent waste fraud and abuse, and allocate the total cost of healthcare properly and accurately.** Every citizen has the right to know they have access to healthcare today.

He will make key points in contrast to the healthcare reform statute “ObamaCare”:

- Billions will be wasted on Exchanges which use 1980s technology. It’s like buying Xerox 820 with 8” disk drives when we have iPhone Apps and the internet.
- The FHCE solution could save the country 25 billion dollars a year on healthcare administration.
- FHCE offers point-of-care eligibility and point-of-care reimbursement for the safety net plans.
- Private sector health insurance market offers the best solutions in free, open and competitive markets.
- There is a difference between health care access and health insurance. FHCE provides health care access to all Americans, while preserving the dynamic, growing, innovative, world-class, uniquely American health care and health insurance markets.

**FHCE’s partners are the ‘who’s who’ of healthcare** and include non profits such as the American Cancer Society and the American Heart Association; Associations such as the National Association of Health Underwriters, and private sector companies such as Anthem Blue Cross and Aetna. FHCE ‘s Chairman, Phil Lebherz, has been in the healthcare/coverage business for 30 years. FHCE’s board is a respected cross section of business and policy leaders including Leonard Schaeffer and Carly Fiorina.
